

# GRIPPERS

Chick Grippers are ideal for heavy machining applications in which wear is a major concern. The hardened steel surface provides an interface that eliminates wearing caused by rough or hard metals. The Chick Grippers also increase the holding power of your fixture, since the serrated surface "bites" into the part, for more aggressive workpiece clamping.

|            | Length      | Width       | Thickness    | Product Number    |
|------------|-------------|-------------|--------------|-------------------|
| Gripper #3 | 9mm (.35")  | 9mm (.35")  | 3mm (.12")   | Plain 005-2531    |
|            |             |             |              | Serrated 005-2532 |
| Gripper #4 | 12mm (.47") | 12mm (.47") | 4.6mm (.18") | Plain 005-2541    |
|            |             |             |              | Serrated 005-2542 |
| Gripper #5 | 15mm (.59") | 15mm (.59") | 5mm (.20")   | Plain 005-2551    |
|            |             |             |              | Serrated 005-2552 |
| Gripper #6 | 19mm (.75") | 19mm (.75") | 6mm (.24")   | Plain 005-2561    |
|            |             |             |              | Serrated 005-2562 |
