

TURNSTACKER BIG 35/70

- ✓ For turning
- √ For loading heavy workpieces
- √ High capacity for diameters up to 300 mm
- ✓ Set up in less than 5 minutes
- ✓ Preparing new batch while robot is running

FEATURES

Rigid industrial construction	✓
Rotating loading table	✓
Full enclosure and protection	✓
Movable	by 5 t forklift
	truck, crane
Placed on 3-point self-centering anchors	✓
Fanuc 6-axis robot arm	35 kg / 70 kg
Drip tray for leaking coolant	✓
Workpiece turn-around station for two-sided	
machining	Option
Status light	Option
Standard robot-machine interface for every	
CNC machine	✓
HALTER SmartControl Intuitive and graphical programming in 12 steps	~
Touch screen	21 inch
Free choice of pre-installed language	✓
Input can be entered in inches or mm	✓
Software analysis for machine utilization	✓
Automatic program storage	✓
Max. number of CNC machines to connect with	4

Workpiece turn-around function for two-sided	✓
machining	✓
Unload-only function in combination with bar feeder	✓
Inside and outside gripping	✓
Workpiece loading in chuck with or without	
pressure star	✓
Adjusting airblow distance	✓
Working with spindle orientation of the CNC machine	✓
Eccentric loading and unloading	✓
Robot park positioning button	✓

Unloading workpiece on pallet	Option
Unloading workpiece on external fixed position,	
e.g. conveyor belt	Option
Unloading of residual material	Option
Collecting a workpiece from a revolver tool	Option
Cleaning of workpiece outside the CNC machine	Option
Positioning workpiece on measuring station	Option
Removal of rejected workpieces	Option
Workpiece side-gripping	Option
Radial positioning of the workpiece in the chuck	Option
Customer-specific functionalities	On request

TURNSTACKER BIG 35/70

Grippers

3-finger gripper for round workpieces	✓
Separate grippers for raw and machined workpieces	✓
Airblow system	✓
Workpiece detection system by open/close	
message	✓
Quickly adjustable gripper fingers	✓
Workpiece-specific gripper fingers	Option
Pressure sensor on the robot arm monitors	
air pressure	✓

Safety	
In-machine-space function	✓
Fanuc DCS area in combination with the Sick	
floor scanner	✓
Sliding door provided with safety sensors	✓
Autom. servo-driven door opener with integrated	
safety mechanism	Option
Closed safety circuit	✓

Input

Voltage	400 V
Peak consumption	16 A / 32 A
Compressed air pressure	6 bar

Dimensions

Length	2800 mm
Width	2250 mm
Height	2220 mm
Total weight	2490 kg / 2800 kg

Capacity

Workpiece diameter (min-max)	43 mm - 300 mm
Maximum height of workpiece	225 mm
Maximum load capacity robot arm	35 kg / 70 kg
Maximum total weight on rotating table	3000 kg
Maximum stacking height	450 mm
Number of stacking stations (1 empty)	12
Maximum weight per station	250 kg
Max. number of workpieces at workpiece height of 10 mm	495
Max. number of workpieces at workpiece height of 20 mm	242
Max. number of workpieces at workpiece height of 50 mm	99
Max. number of workpieces at workpiece height of 70 mm	66
Max. number of workpieces at workpiece height of 85 mm	55
Max. number of workpieces at workpiece height of 110 mm	44
Max. number of workpieces at workpiece height of 150 mm	33
Max. number of workpieces at workpiece height of 225 mm	22

BENEFITS

The HALTER LoadAssistant offers enormous advantages for your business. The experience from the users of the HALTER LoadAssistant shows us that this investment can be repaid very quickly (6-18 months).

- ✓ You realize extra output because the actual spindle hours no longer exclusively depend on the regular working hours. Also within regular working hours you realize more output, because the robot has no breaks or downtime.
- You can better respond to small or unexpected orders, because of the quick set-up time of the CNC robot cell and because it can also be run outside regular working hours.
- ✓ Decrease of hourly production costs, because the labor costs of an operator are 5 to 8 times higher than the depreciation costs of the HALTER LoadAssistant robot cell.

WORKPIECE-SPECIFIC SOLUTIONS

Halter's application engineering team can design grid plates and special gripper fingers for your specific workpieces.

HALTER PORTFOLIO

The solutions that we offer ensure you can automate the production of a wide variety of workpieces. Discover our models and the different types below.

UNIVERSAL

COMPACT 12 TURNING/MILLING

- ✓ Long shafts option
- ✓ Smallest footprint
- ✓ Easily moved from one CNC machine to another

PREMIUM 20/35 TURNING/MILLING

- ✓ Most versatile system on the market
- ✓ Easily moved from one CNC machine to another
- ✓ Set up in less than 5 minutes

BIG 35/70 TURNING/MILLING

- √ Long shafts option
- √ For loading heavy workpieces
- √ High capacity for workpieces with bigger dimensions

Payload 12 kg	Payload 20 kg / 35 kg	Payload 35 kg / 70 kg
Max. workpiece size	Max. workpiece size	Max. workpiece size
135 mm x 135 mm	270 mm x 270 mm	300 mm x 300 mm
Ø 135 mm	Ø 270 mm	Ø 300 mm
Max. workpiece length	Max. workpiece length	Max. workpiece length
150 mm	250 mm	300 mm
Optional workpiece length	Optional workpiece length	Optional workpiece length
(long shafts) 250 mm	(long shafts) 450 mm	(long shafts) 800 mm

TURNSTACKER

COMPACT 12 **TURNING**

- √ High capacity for diameters up to 160 mm
- ✓ Smallest footprint
- ✓ Easily moved from one CNC machine to another

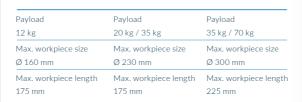

PREMIUM 20/35 TURNING

- √ High capacity for diameters up to 230 mm
- ✓ Easily moved from one CNC machine to another

BIG 35/70 **TURNING**

- √ For loading heavy workpieces
- √ High capacity for diameters up to 300 mm

MILLSTACKER

COMPACT 12

to another

MILLING

MILLING

- √ High capacity for workpieces up to 200 mm 300 mm
- ✓ Smallest footprint ✓ Fasily moved from. one CNC machine

PREMIUM 20/35

- √ High capacity for workpieces up to
- ✓ Easily moved from one CNC machine to another

BIG 35/70 MILLING

- √ For loading heavy workpieces
- ✓ High capacity for workpieces up to 400 mm
