

When to choose a BJP electromagnetic chuck:

The BJP electromagnetic chuck is suitable heavy duty grinding of a wide range of parts from a minimum size of 35 x 35 x 3 mm. Thanks to the combined pole pitch, it also clamps very large parts very well. The electromagnet is operated simply by pressing the button on the remote control of the control unit. This unit also provides variable adjustment of the force to create optimum conditions for clamping.

APPLICATION

Grinding

TECHNOLOGY

Electro

CHUCK DIMENSION

from 200 x 600 mm

HOLDING FORCE

130 N/cm²

POLES

Transverse

Important parameters:

Application:	Grinding
Technology:	Electro
Holding force:	130 N/cm ²
Min. workpiece size:	35 x 35 x 3 mm
Regriding limit:	7 mm
Pole pitch:	42 mm
	further refined 4+1 (steel/brass)

Use:

- + heavy duty grinding for a wide range of workpiece sizes

Model	W (mm)	L (mm)	H (mm)	Wattage (W)	Weight (kg)
