MILLSTACKER COMPACT 12

- ✓ For milling
- √ High capacity for workpieces up to 200 mm
- ✓ Smallest footprint
- ▼ Easily moved from one CNC machine to another
- ✓ Set up in less than 5 minutes
- ▼ Preparing new batch while robot is running

FEATURES

System		HALTER SmartControl standard functionalities	
Rigid industrial construction	✓	Positioning workpiece in machine vise with	
Rotating loading table	✓	soft push function	
Full enclosure and protection	✓	Workpiece turn-around function for two-sided	
Movable	by pallet truck	machining	
Placed on 3-point self-centering anchors	✓	Workpiece regripping for accurate positioning	
Fanuc 6-axis robot arm	12 kg	Inside and outside gripping	
Drip tray for leaking coolant	✓	Adjusting airblow distance	
Workpiece side-gripping station	Option	Working with spindle orientation of the	
Workpiece turn-around station for two-sided		CNC machine	
machining	Option	Eccentric loading and unloading	
Status light	Option	Robot park positioning button	
Standard robot-machine interface for every			
CNC machine	✓	HALTER SmartControl enables the following optional functionaliti	
		Unloading workpiece on pallet	Op
HALTER SmartControl		Unloading workpiece on external fixed position,	
Intuitive and graphical programming in 12 steps	✓	e.g. conveyor belt	Ор
Touch screen	15 inch	Unloading of residual material	Op
Free choice of pre-installed language	✓	Cleaning of workpiece outside the CNC machine	Op
Input can be entered in inches or mm	✓	Positioning workpiece on measuring station	Ор
Software analysis for machine utilization	✓	Removal of rejected workpieces	Ор
Automatic program storage	✓	Workpiece side-gripping	Ор
Max. number of CNC machines to connect with	4	Customer-specific functionalities	On r

MILLSTACKER COMPACT 12

Grippers 2-finger gripper for rectangular workpieces Separate grippers for raw and machined workpieces ~ Airblow system Workpiece detection system by open/close message Quickly adjustable gripper fingers Workpiece-specific gripper fingers Option Pressure sensor on the robot arm monitors air pressure Safety In-machine-space function Fanuc DCS area in combination with the Sick floor scanner Sliding door provided with safety sensors Standard safety fence between CNC machine and the Halter Autom. servo-driven door opener with integrated safety mechanism Option Closed safety circuit Input Voltage 400 V Peak consumption 16 A Compressed air pressure 6 bar

Minimum workpiece (L x W)	25 mm x 25 mm
Maximum square workpiece (L x W)	125 mm x 125 mm
Maximum rectangle workpiece (L x W)	50 mm x 200 mm
Maximum height of workpiece	175 mm
Maximum load capacity robot arm	12 kg
Maximum total weight on rotating table	775 kg
Maximum stacking height	350 mm
Number of stacking stations (1 empty)	12
Maximum weight per station	70 kg
Max. number of workpieces at workpiece height of 10 mm	385
Max. number of workpieces at workpiece height of 20 mm	187
Max. number of workpieces at workpiece height of 50 mm	77
Max. number of workpieces at workpiece height of 70 mm	55
Max. number of workpieces at workpiece height of 85 mm	44
Max. number of workpieces at workpiece height of 110 mm	33
Max. number of workpieces at workpiece height of 150 mm	22

BENEFITS

The HALTER LoadAssistant offers enormous advantages for your business. The experience from the users of the HALTER LoadAssistant shows us that this investment can be repaid very quickly (6-18 months).

- You realize extra output because the actual spindle hours no longer exclusively depend on the regular working hours. Also within regular working hours you realize more output, because the robot has no breaks or downtime.
- You can better respond to small or unexpected orders, because of the quick set-up time of the CNC robot cell and because it can also be run outside regular working hours.
- Decrease of hourly production costs, because the labor costs of an operator are 5 to 8 times higher than the depreciation costs of the HALTER LoadAssistant robot cell.

WORKPIECE-SPECIFIC SOLUTIONS

Halter's application engineering team can design grid plates and special gripper fingers for your specific workpieces.

HALTER PORTFOLIO

The solutions that we offer ensure you can automate the production of a wide variety of workpieces. Discover our models and the different types below.

UNIVERSAL

COMPACT 12 F TURNING/MILLING T

- ✓ Long shafts option
- ✓ Smallest footprint
- ✓ Easily moved from one CNC machine to another

PREMIUM 25/35 TURNING/MILLING

- ✓ Most versatile system on the market
- ✓ Easily moved from one CNC machine to another
- ✓ Set up in less than 5 minutes
